## Street Horrrsing

ATP

**Mischievously named UK ravers bring the noise**

"Noise" remains a foreboding sort of genre, not so welcoming to the casual listener, but Ben Power and Andrew Hung have ambitions beyond denting your eardrums. *Street Horrrsing's* principal antecedents would seem to be psychedelically minded US bands like Black Dice or early Animal Collective, the likes of "Sweet Love For Planet Earth" powering along on fuzzed-out synth melodies, and mangled, bust-mike vox. Key, however, is a rhythmic edge – be it tribal drumming or waves of sound – that tip these rainbow drones into full-on euphoria. LOUIS PATTISON
