

# Hot albums

## Estelle

*'Shine' Atlantic*

This slam-dunk of a comeback from London's previously underrated nu soul gal is packed full of guests (Kanye, John Legend, Cee-Lo) and smash hits.

## Black Keys

*'Strange Times' V2*

Omnipotent producer Danger Mouse adds eerie gospel swells to the Akron, Ohio blues duo's thick and furious riffs.

## Foals

*'Antidotes' Transgressive*

The dark-hearted artrockers' debut has finally arrived and it's a killer blend of polyrhythmics and unpop tunes.

## Fuck Buttons

*'Street Horrrsing' ATP*

This is *not* noisecore. Blissful, almost euphoric ambience battles it out with grim foreboding on this sublime album.
